Comprehensive NDIS Application Support

Applying for the NDIS can be a daunting task, involving the collection of appropriate evidence from various professionals such as GPs, psychiatrists, specialists, community teams, and hospitals. We offer a range of services to ease this process:

- **1:1 Intervention for NDIS Evidence Gathering:** We assist clients in gathering the necessary evidence from relevant professionals to support their NDIS application.
- **Assistance with Formation and Collection of NDIS Application Evidence:** Our team helps in the formation of the NDIS application and collects all necessary evidence to build a strong case.
- **Personalized Application Creation:** We craft applications centered around the client's specific needs, ensuring the application is relatable and comprehensive.
- **NDIS Application Lodgement:** We handle the submission of the NDIS application, ensuring all details are correctly filled out and submitted on time.

These processes can be tough and time-consuming, but our assistance ensures a smooth and stress-free application process with no hidden agendas and no obligation to sign up for our services once your application is approved.

Who We Assist

We extend our support to the following team members to ensure a comprehensive and collaborative approach to the NDIS application process:

- **Potential Participants:** Offering direct assistance in application preparation and evidence gathering.
- **Family Members:** Providing support and guidance to help family members understand the NDIS process and how they can assist.
- **Social Workers:** Collaborating with social workers to ensure the application includes all necessary social and community support evidence.
- **Psychiatrists:** Working with psychiatrists to gather essential mental health evidence and documentation.
- **Community Teams:** Coordinating with community teams to integrate community support and services into the application.
